CODE IN THE COMMUNITY

INVENT. INNOVATE. IMPLEMENT.

**FREE**

**CODING CLASSES**

**KIDS 8 - 15 YRS**

**10 weeks, 2 hours weekly every Sat or Sun**

**New runs starting throughout 2018**

**Multiple locations around Singapore**

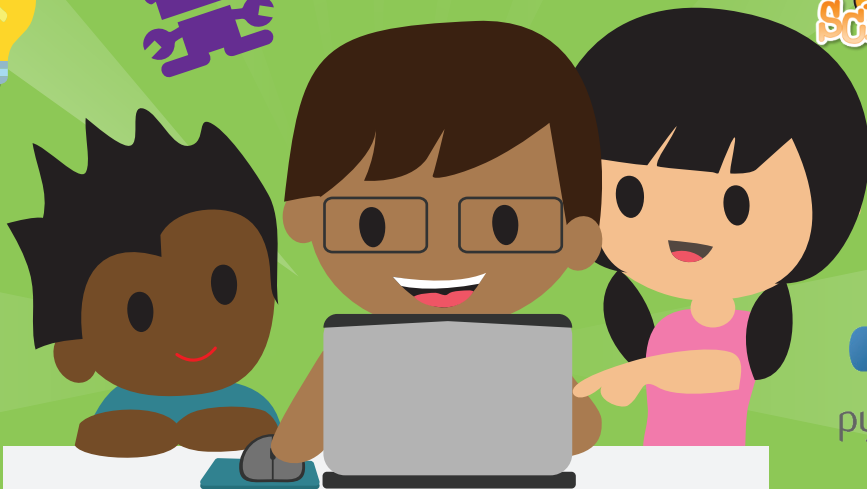

Visit Google  
Singapore  
office

Receive a  
codeable  
device

Learn new  
skills and have  
fun!

SCRATCH

python

# Give your child a taste of computer science!

**Junior (8-11):** Learn the basics of computational thinking through an interactive software program known as Scratch, building foundation of computer science through fun and interactive lessons and examples.

**Senior (12-15):** Be introduced to basic computer science concepts through a text-based programming language known as Python. Essential fundamental knowledge for programmers will be introduced through real-life applications to keep the children's interest piqued.

## 10 weeks, 2 hours weekly every Sat or Sun
